bringing innovation and technology to lighting design

MagicQ

CONTROL CONSOLES

Frustrated with the limitations of
your existing lighting desk?
Stuck with desks designed in the 1990's
near their end of life?

Easy!

ChamSys proudly presents its new MagicQ range of powerful consoles. Carefully designed for maximum useability, MagicQ consoles enable you to effortlessly realise your designs.

MagicQ is designed to do what you want it to do, breaking the limits of traditional consoles. Latest technology allied with innovative thinking gives you the control to achieve spectacular results.

MagicQ combines the responsive feedback of quality buttons and faders for accurate show playback whilst enabling intricate show programming and editing through intuitive graphical interfaces.

Designed by Lighting Designers for Lighting Designers MagicQ breaks new ground in simultaneous control of lighting and video effects.

MagicQ consoles are equally at home in the smallest theatre or the largest stadium. One console, all purposes.

MagicQ consoles are more than just a lighting desk. With in-built support for numerous entertainment industry protocols and interfaces, MagicQ is the key to complete show production.

And this is just the start - ChamSys has an ambitious program of exciting enhancements planned for MagicQ.

After using MagicQ we're positive you'll never want to use any other console.

Simple!
